

# PAS 55-1 : 2008 Asset Management Certification

Physical assets are important assets of most of the organizations. To these organizations, the integrity, safety and reliability of physical assets are great concerns. Adopting a suitable assets management system is an effective solution. PAS 55 is the British Standards Institution's (BSI) Publicly Available Specification for the optimized management of physical assets. It shows promise to become a world-wide specification for any organizations seeking to demonstrate a high level of professionalism in whole life cycle management of their physical assets.

PAS 55-1 is the specification for the physical management of assets, supplemented by PAS 55-2, "Code of Practice for Implementing Physical Asset Management." The specification provides guidance and a 28-point requirements specification for establishing and verifying a joined-up, optimized and whole-life management system for all types of physical assets.

PAS 55 applies to all sectors and all assets types of any organization, public or private, small size enterprises or multinationals. ACI devotes to providing professional certification services according to customers' requirement. Organizations that wish to optimize their assets management in whole life cycle are welcome to contact us.

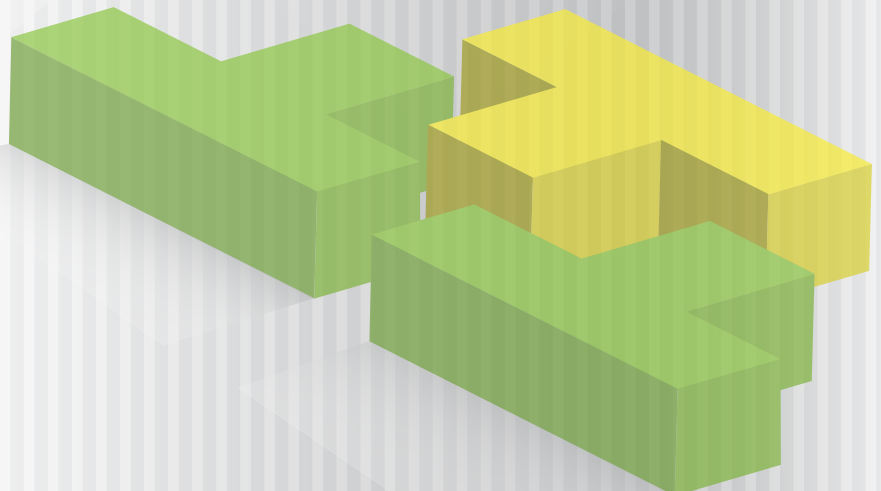

## Benefits:

Improve the assets management performance by life cycle planning, cost/risk optimization and join-up thinking.

Provide 28-point checklist for good practice in assets management.

Improve the operation performance of assets management to enhance the competitive advantage.

Demonstrate commitment to sustainability development.

## 資產管理認證

對於絕大多數的組織來說有形資產都是非常重要的資產。有形資產的完整性，安全性和可靠性都是需要關注的重點，因此採取一套合適的資產管理系統是個有效的解決方案。PAS 55 是英國標準協會 (BSI) 制定的用於優化有形資產管理的公共可用規範。該規範有希望成為世界廣泛使用的標準，特別是對於那些想要展示整個生命周期的有形資產管理中的高專業水準的組織。

**PAS 55 -1** 為有形資產管理規範，而**PAS 55 -2** 作為補充，是關於“實施有形資產管理的執行守則”。該規範中為建立和驗證一個關聯，優化及全生命周期的各種有形資產管理體系提供了指引和28方面的要求。

**PAS55**適用於任意規模的公共或者私人組織的任何有形資產。國際認可認證有限公司 (ACI) 致力於根據客戶需要提供專業的認證服務。歡迎希望優化資產管理的組織諮詢。

### Benefits:

- 通過全生命周期的規劃，優化成本/風險以及關聯思考來提供資產管理
- 在資產管理中提出28方面的要求
- 改進資產管理的運作表現來提高公司的競爭力
- 展現在可持續發展方面的努力
