

IRCA Approved ISO14001:2004 EMS Auditor Conversion Course (Reg.No.A17315) (Course Code: TE5) A COURSE TO FAST CAREER SUCCESS!

Accredited Certification Int'l Ltd.

Introduction

This training course has been developed in line with IRCA requirements IRCA/2007.

Capitalizing on the powerful Accelerated Learning Technique, this course spends a good portion of the time on discussions, exercises and case studies to help students to consolidate knowledge and acquire hands on experience that are instrumental in their capacity as a environmental management system auditor or environmental management function personnel.

Students who passed the continuous assessment and the 1.5 hour written examination will be awarded a Certificate of Successful Completion. Based on IRCA policy, this course satisfies the training requirement for certification as an IRCA EMS Lead Auditor/Auditor when supported by another valid IRCA approved 5 day Lead Auditor Training Course Certificate of Successful Completion. This course run in collaboration with HK Veritas Ltd. (IRCA AO17253)

Objectives and Achievements

- Describe the purpose of an EMS and explain the principles, processes and techniques used for the assessment and management of risk, including the significance of these for EMS auditors.
- Explain the purpose, content and interrelationship of ISO 14001, the ISO 14000 series guidance standards, and the legislative framework relevant to an EMS.
- Undertake the role of an auditor to plan, conduct, report and follow up an audit in accordance with ISO 19011 and by interpreting the requirements of ISO 14001.

Who Should Attend?

- Line/Support function personnel who are involved in EMS implementation
- Staff who are charged with the responsibility to develop and maintain an EMS
- All EMS auditors who wish to acquire an internationally recognized auditor status

Prerequisite

This course is designed for experienced management systems auditors seeking additional skills in auditing environmental management systems. Students are expected to have some background/knowledge in environmental management and have completed a lead auditor training in any discipline of management system.

Methodology

There is a balance between knowledge-based presentation, discussions, exercises and case studies. About two third of the time is spent on activity based learning. A mock examination paper will be discussed throughout the course to help students to be familiar with the style of the examination.

Course Contents

- General introduction and auditor registration
- Introduction to environmental issues and risk
- Introduction to ISO 14000 series and ISO 14001 EMS
- The legislative framework
- Documentation review and checklist preparation
- Process auditing and gathering objective evidence, auditing skills
- Writing NC reports and reporting the audit
- Audit follow up

Course Certificate

Participants who successfully complete this course and pass the examination will be awarded a certificate which may be used in support of an application to be registered as an Auditor or Lead Auditor with the CQI International Register of Certificated Auditors.
