## ACI Training Course

---

<b>Code (TIS1)</b>	<b>ISO 27001:2005 Awareness Training</b> <b>(9:30am – 5:00 pm) 1 day</b>
--------------------	---

### Overview

Company has been investing many resources on IT infrastructure, application and communications to protect leakage of information. Handling numerous data and information daily is now a business trend. Thus, any downtime will create great impact to daily operations and any information leakage to the public will ruin the Company's reputation and confidence. Thus, the best practice and standard for managing information system security are established aiming at providing guidelines on deployment of information security management system and protecting the information security and related asset and infrastructure.

### Objectives

In this course, delegate can learn the requirements and framework of information security management system. The best practices on risk management, asset management, and human resource security, incident and problem management will be elaborated as well. In additional, hands-on workshop will be arranged to allow the participants to practice the information security.
