Your True Partner in Management System Training

ACI Training Course

Code (TSR 2)	ISO 26000 Social Responsibility Effective Application (9:30am – 5:00 pm) 1 day
---------------------	--

Overview

Nowadays, social responsibility plays a critical role in world-wide business. In order to respond to this trend, ISO 26000 outlines the requirements to enable an organization to establish, implement, maintain and improve a social responsibility management system, including those aspects critical to the stakeholders of the corporations. It can be expected that ISO 26000 will become one of the co-operative components of social responsibility of a corporation. No matter you are serving internally or providing services to your valuable customers, you and your company should not miss this opportunity to learn and apply the best practice into their daily operation to contribute better to the society in an effective approach.

Objectives

Through this one-day training workshop, delegates can understand the importance of social responsibility which includes the concept behind and application of ISO 26000 certification. In addition, the approach on establishing a management system for social responsibility of an organization will also be introduced.
