ISO 14001 Environmental Management System Certification

ISO 14001 is the internationally recognized standard for an environmental management system (EMS). It provides guidance on how to manage the environmental aspects of activities, products and services more effectively. An EMS helps a company to continually improve its ability to efficiently identify, minimize, prevent and manage environmental impacts as they arise, therefore reducing risk. ISO 14001 can be established in any organization, regardless of its size or sector. It is becoming more and more imperative that environmental progress is important to business bottom line and essential healthy economy and prosperous society.

Benefits

- Improves environmental performance
- Minimizes insurance costs
- Minimizes incidents that result in liability
- Maintains or enhance good public/community relations
- Satisfies vendor/investor criteria
- Enhances image and global competitiveness
