Energy Management & Carbon Emission Management Audit (ACI-Carbon Reduction Compliance Certificate based on ISO 14064)

能源管理和碳排放管理審核 (基於ISO14064符合ACI-減碳排放資格證書)

As two of the major challenges of our time for the international community, climate change and energy issue have a close relationship. The future high prices of the available fossil fuels is becoming a major concern to corporations, at the meantime taking care of the environment has become important in showing the organizations' social responsibilities. To improve energy efficiency and energy conservation performance in a systematic way can not only enable corporations to become less dependent on energy, hence reduce the cost and the concern about the future high energy price, but also have a significant effect on carbon emission reduction and reduce the pollution to the environment.

ACI is committed to working closely with the government and industry in energy efficiency improvement and carbon emission reduction. This verification is designed to assist organizations to improve their energy efficiency and energy conservation performance

We may issue an ACI-Carbon Reduction Compliance Certificate to any organization which has followed the requirements of ISO 14064.

Benefits:

- ~Improving business performance with energy reduction strategies.
- ~Understand the key approaches to an energy management system.
- ~To enhance energy conservation measure in greenhouse gases (GHG) emissions and removals
- ~To implement the carbon footprint assessment methodology in GHG emissions and carbon reduction

氣候問題與能源問題是當今國際社會的其中兩大挑戰，而兩者間也有著密不可分的關係。未來礦物燃料高企的價格成爲企業的一個憂慮，同時通過對環境的關懷和保護來表現企業的社會責任也變得甚爲重要。通過系統地改進能源的利用和節能的效果，一方面既能減少企業對於能源的依賴，節省生產成本，從而減輕對於未來能源的高價格的憂慮，另一方面對於減少碳排放，減少對環境的污染也有著顯著的作用。因此，提高能源利用效率和減少碳排放對於企業的可持續發展越來越重要。

國際認可認證有限公司（ACI）一直與政府和整個行業一起爲提高能源利用率和減少碳排放而努力。本系列課程特爲幫助學員提高他們的節能減碳意識和參與其中的控制。

我們可為符合ISO14064相關要求的組織頒發符合ACI-減碳排放資格證書。

好處：

- ~實施節能策略提高商業表現
- ~掌握能源管理體系的關鍵措施
- ~加強溫室氣體減排節能措施
- ~執行在溫室氣體排放和減碳中的碳足跡評估方法
