Your True Partner in Management System Training

ACI Training Course

Code: TCA1 ISO 14064 and Carbon Accounting
(9:30a.m. – 5:00p.m.) 1 day

The global warming impact is increasingly affecting the governmental legislates and private business sectors. The pressure not only comes from the increasing requirement of social responsibility, but also effective carbon emissions control is becoming another norm of ethical management.

International Organization for Standardization (ISO) has developed the ISO 14064 standard to Greenhouse Gas (GHG) emissions management as a priority area to reduce GHG emissions. Corporations need to trace out their own GHG emissions and look for suitable means to reduce the impacts. This standard enables organization to measure and report their GHG emissions consistently.

In meeting this challenge, effective GHG management is a priority focus for us.

ACI provides this opportunity for management delegates who want to build their skills in the GHG management systems and able to determine their infrastructure carbon emissions. We can assist you to develop the GHG emissions management strategies that will definitely become part of your organization management framework. It is also the way to your business sustainability in the future.

The course is designed around the requirements of ISO 14064.

Target Audience

- ~ Delegates who responsible for Corporate Social Responsibility (CSR).
- ~ Policy developers, managers and auditors who want to move into the GHG management field.
- ~ Practicing engineers, building services managers, plant managers and consultants.
- ~ Environmental officers and managers.

Objectives

- ~ To understand the ISO 14064 and standard implementation.
- ~ To understand the Carbon Accounting Principles and carbon footprint.
- ~ Quantification methodologies of Greenhouse gases (GHG) emissions and removals.
- ~ Guidance at the organization level for the quantification and reporting of the GHG.

Details

- ~ General Introduction of ISO 14064.
- ~ Understanding of the GHG inventories and emission accounting.
- ~ Carbon Accounting Principles Implementation.
- ~ GHG quantification methodologies.
- ~ Introduction of Carbon accounting guidelines in Hong Kong.

Methodology

- ~ Presentation, workgroup discussion and exercise.

Certificate

- ~ Certificate of Successful Completion will be issued to delegates who have attended full course.

Venue

- ~ ACI training centre

您在管理系統訓練上的真誠夥伴

ACI 培訓課程

Code: TCA ISO 14064 與碳核算
(9:30a.m. – 5:00p.m.) 1 日

全球氣候變暖的影響正日益影響著政府，立法機構和私人企業。壓力不僅來自於不斷增加的社會責任要求，而且有效的碳排放控制正成為另一個社會道德責任管理規範。

國際標準化組織（ISO）的已經發展的ISO 14064 標準為優先的溫室氣體（溫室氣體）減排管理標準。公司需要跟踪描述出他們自己的溫室氣體排放量，並尋找適當的方法來減少因氣體排放帶來的影響。此標準使公司機構能夠一致地衡量和報告其溫室氣體排放量。

為迎接這一挑戰，有效的溫室氣體管理是我們優先考慮的重點。

國際認可認證有限公司為那些希望建立起關於溫室氣體（GHG）的排放管理系統的技能，並且測定基礎設施的碳排放量的管理層代表提供了這個機會。我們可以協助您開發溫室氣體（GHG）的排放管理策略，這些策略將成為組織管理架構的一部份。這也是你未來在事業持續發展的一條道路。

本課程根據國際標準化組織 14064 的要求而設計。

培訓對象

- ~ 負責企業社會責任的代表。
- ~ 想進入溫室氣體排放管理領域的政策制定者，經理，審核員。
- ~ 工程師，建築服務經理，工廠經理和顧問。
- ~ 環境官員和經理。

培訓目的

- ~ 瞭解 14064 的標準和實施詳情。
- ~ 瞭解碳核算和碳足跡。
- ~ 溫室氣體排放和減排的量化方法。
- ~ 溫室氣體量化和報告的組織層次的指南。

培訓內容

- ~ ISO14064的總體介紹。
- ~ 理解溫室氣體庫存和排放的審計。
- ~ 碳核算實施原則。
- ~ 香港的碳核算指引簡介。

上課模式

- ~ 講課，小組討論和練習。

證書

- ~ 達到高出席率之學員將獲頒發課程完成證書乙張。

上課地點

- ~ ACI 訓練中心。
