ACI proudly delivered Quality Improvement courses using Seven QC Tools to Bureau Veritas (HK) Lab & Coaching Workshop on Quality Control Circle (QCC) Projects to EMSD

◆ ACI proudly delivered Quality Improvement course using seven QC Tools to Bureau Veritas (HK) Laboratory as well as the Coaching workshops on QCC projects for Electrical and Mechanical Services Department (EMSD) of the Hong Kong Government for their better understanding and implement of the Quality Control Circle (QCC).

The objective of the courses was to let the participants learn different “Know How” methods through step-by-step learning and participation. The courses also gave assistance to the internal staff of enterprises on implementing different management systems, so as to improve the management quality within the organization. Finally they could apply the quality improvement methods in the workplaces. Here are the highlights of the quality improvement course:

- Learn how to simplify the complicated data, thus transforming them into systematic and effective information by application of graphs.
- Learn how to solve problems effectively using a step-by-step process and be able to interpret and make accurate business decisions using the correct tools.
- Experience the team dynamics in solving problems.

If you are interested to know more about quality improvement methods or you encounter difficulties in implementation of quality control plans, you are encouraged to enroll in our course. For more information, please feel free to contact us.
